TABLE OF CONTENTS.

[NOTE —The forms in this book have no connection whatever with those in Part IIA. The first six forms are merely given as an illustration of the manner in which the forms of the Buildings and Road branch may be adapted to suit the requirements of the Irrigation branch; all other forms of the Buildings and Road branch which are generally applicable, will be found in Part IIA. Forms 99, 101, 103, 104 and 105 are purely Irrigation forms.]

No.	DESCRIPTION OF FORM	Reference to P. W. D. Code.	Page	REMARKS
72	Irrign . Register of expenditure against budget grants	Vol. II, Chap. III, paras. 210 and 211	1	
73	" . Register of receipts and charges	" " " " " 210 to 212 and 325 to 332	5	
74	" . Sub-register	" " " " " 15, 72, 210 and 213.	15

99	" . Administrative accounts	" " " " " 344 to 354 .	121	
101	" . Register of Public Works Tuccavee outlay .	" " " II, para. 47 I . .	143	
103	" . Statement showing the income from, and expenditure on, re-productive works during the year	" " " III " 372 . .	145	
104	" . Statement showing the amount of interest payable by the Local Government on the Capital expenditure during the year on Irrigation works not charged against Revenue . . .	" " " " paras. 373 and 374	149	
105	" . Statements showing the Financial results of Irrigation works for, and to end of, the year.	" " " " " 375 and 376	151	

NOTES.

Reference to P. W. D. Code.

Vcl. II, Chap. III, paras. 210 and 211.

1. This register will be posted from divisional schedules of expenditure (Form No 32 O), and from it will be prepared the schedule of expenditure against budget grants which accompany the account-current (Form No. 79) rendered to the Accountant General, Public Works Department.

2. The net outlay against grant should be compared monthly with the similar figure entered in the Register of receipts and charges (Form No. 75).

3. The last three columns of this register will not be required in the case of provincial and incorporated local funds and there will be no entries in the column headed "Exchange" in the case of works of capital outlay on which is not charged against revenue.

____ PROVINCE.

CENTRAL OFFICE OF ACCOUNT.

BRANCH—*Irrigation.*

YEAR_____

Register of expenditure against
budget grants.

NOTES.

P. W. D. Form No. 73—Irrign.

Reference to P. W. D. Code

Vol. II, Chap. III, paras. 210 to 212, and 328 to 332

1. This register will be posted from the divisional accounts-current (Form No. 27).

2. If desired, separate folios may be kept for circles, the total of each circle being brought forward in one folio.

3. From this register the account-current of the province (Form No. 79) is prepared for submission to the Accountant-General, Public Works Department.

4. As soon as the final supplementary accounts for March are booked, the register must be closed and balanced. To do this, the total debits (receipts) and credits (charges) of the year to the accounts which close under "Government," and which are enumerated on the last page of the register under "closing balances," must be brought over and entered under the columns and against the accounts concerned. The expenditure to be entered against fund heads will be the total charges on final heads and will be obtained from the registers of expenditure against budget grants (Form No. 72). The figures thus entered should agree with the total receipts and charges in Part IV of the annual summary (Form No. 97). The difference between the total debits and credits will constitute the balance under "Government at end of the year." This balance is the sum of the closing balances of all suspense accounts plus the amount of cash in hand at the end of the year and is worked out in detail below the account of "closing balances."

5. Every endeavour should be made to bring to account all the transactions of a year into the accounts of the year to which they pertain, but if any transactions should be advised for adjustment after the books of the year have been finally closed, they should be reported to the Accountant General, Public Works Department, for orders.

FRAMING OF THE CODE

REVISIONS

REVISIONS

Sub-Editor

NOTES—*concl'd.*

left optional with the Examiner to show only the total revenue here without maintaining the distinction between each canal, provided the necessary information is given in the separate register prescribed in P. W. D. Code, Vol II, Chap II, para 34.

14. When works appertaining to the Buildings and Roads branch are executed in an Irrigation division, they should be detailed in the Sub-register under the head "Towers, Buildings and Roads branch," in the same manner as if they had been constructed in a division of the Buildings and Roads branch. By the introduction of this system, it is necessary for entering the works in detail in the Examiner's office, which accounts will be done away with. The same procedure will be adopted in the case of revenue received in an Irrigation division for the Buildings and Roads branch, but the abstract of such revenue and expenditure will be posted under the head "Towers, Buildings and Roads."

15. The outlay in each canal, &c., under construction or maintenance should be detailed in accordance with the prescribed heads of classification; Appendix II to P. W. D. Code, Vol II; there will be no necessity for having proper sub-totals for the totals under each main head, as this should be given in the summary (see next paragraph).

16. To enable a check to be exercised over the entries referred to in the preceding paragraph, and to assist in the preparation of the annual Finance and Administrative accounts, the system of "summaries" has been introduced. There should be a summary for each distinct class of works, viz., repairs (see page XLV, Appendix II, P. W. D. Code, Vol II) and the entries for them, which should be made by main and sub-heads only, should be taken in, in the detail of expenditure on the different canals, &c. To assist in the check referred to above, it will be necessary to keep the summary entries and the total of each sub-head entry, and to have a copy posted into it, the total of such entries, against which the expenditure under works and repairs shown in the Register is exp. nature against budget estimate.

17. As, however, such detailed information may not be required during the year, the Examiner may, in lieu of the procedure prescribed in para. 10 above, keep the summary of expenditure on Irrigation works on sub-heads only—thus, the entries may be registered, as the work, the expenditure being summarised as follows:—

"A" card of

Head works	.	.	.
Main canal and branches	.	.	.
Distribution	.	.	.
Drainage and protective works	.	.	.
Total "A" card	.	.	.

(Continued on next page)

the details be sub-headed under proper and appropriate register at the end of the year to be the necessary information for the Finance and Administrative accounts.

18. The entries under Tools and plant will be covered by each distinct class or class of work for which the estimate has been sanctioned. Any transfer of percentage charges for Tools and plant to the Buildings and Roads branch, Talavi account, Contributory works, &c., will be deducted from the total charge under "Provincial Minor works and navigation," if the division is classed under that head or "Imperial, &c.—Major Irrigation works—construction" as the case may be.

Summary of financial results of Irrigation and Navigation works for which Capital and Revenue accounts are kept		139

NOTES.

Reference to P. W. D. Code.

Volume II, Chapter III, paras. 344 to 354.

1. Simultaneously with the preparation of the annual Finance accounts, the administrative accounts of the Irrigation Branch should be compiled in form No. 99 Irrigation, for works which are constructed with the prospect of yielding a return, i. e., those works for which Capital and Revenue accounts are kept.

2. This form is an abstract of the accounts Nos. 2 to 6 which follow it. The financial results of Productive and Protective Irrigation works should be shown separately in this form.

3. The figures to be entered in the column headed "Cost of construction as now estimated" should, in the case of works the construction estimates of which are not closed, be the aggregate of the sanctions accorded by competent authorities up to the close of the year to which the accounts relate. In the case of works the construction estimates of which are closed, the figures in the columns mentioned should be the aggregate of (1) the actual expenditure against the construction estimates which have been closed, (2) the actual expenditure on all works which were sanctioned after the closure of the construction estimate and reported as complete at the end of the year to which the accounts relate and (3) the estimated cost of all unfinished works.

4. When an estimate includes several works it should be considered as current until all the works comprised in that estimate are completed and the estimate closed.

5. Separate "General abstracts" should be prepared for Major Works, and for Minor Works and Navigation for which Capital and Revenue accounts are kept. In the General abstract for the latter class of works the last five columns should be omitted.

The Annual 1896.

By the order of the P. W. D. Officer,

NOTES.

Reference to P. W. D. Code.

Form II, Chapter III, paras. 344 to 354.

1. The Capital account is to be a record of the expenditure directly incurred against the sanctioned estimates for the construction of the work, and of nothing more. The record of the outlay must be in detail by sections corresponding with the detail in the abstract of sanctioned estimate.

2. The entries will be taken, as regards "previous" charges, from the Administrative accounts for the previous year, and the outlay of the year, from the Sub-register. From the total thus obtained the receipts on Capital account during the year and up to date should be deducted, and the net outlay carried to the "General Abstract" account No. 1.

3. The entry in the column headed "Cost of construction as now estimated" will be made in accordance with the instructions contained in paras. 3 and 4 of the notes on the General Abstract of financial results.

4. The difference between the last two columns in this account will represent the sanctions still current under each sub-head.

5. There should be a separate Capital account for each project or canal, whether classed as a Productive Public Work, a Protective Public Work, or under Minor Works and Navigation for which Capital and Revenue accounts are kept.

NOTES.

Reference to P. W. D. Code.

Volume II, Chapter III, paras. 344 to 354.

1. A Revenue account should be opened for each project as soon as a section is completed and commences to yield revenue. The Revenue account is a record of all revenue derived from the undertaking, whether realized in the Public Works Department or elsewhere and it is to be charged with the maintenance and working of the project, including all outlay on minor extensions and improvements which have not been distinctly sanctioned against the Capital account.

2. The entries as regards receipts and charges to end of previous year will be taken from the Administrative accounts for that year, and for the current year from Schedules I and A of the Finance accounts and from the Sub-registers. After the Direct charges (including any transactions by the Civil Department) have been detailed and the total arrived at, the Indirect charges, which will be obtained from account No. 5, should be added, and the sum carried to the "General Abstract," account No. 1. When this has been attended to the account should be balanced, the balance showing the net *plus* or *minus* revenue (surplus or deficit), as the case may be.

3. There should be a separate Revenue account for each project or canal, whether classed as a Productive Public Work, a Protective Public Work, or under Minor Works and Navigation for which Capital and Revenue accounts are kept

Volume II, Chapter III, paras 344 to 354.

1. The Interest account is a simple debit and credit account, showing on the one side the charges for interest, and on the other the net revenue or balance of the Revenue account of each project classed as a Productive or Protective Public Work. Interest is to be calculated annually at the rate of 4 per cent on the direct capital outlay to end of previous year plus half the outlay of the year. In making this calculation it should be borne in mind that indirect charges to the Capital account are to be included.

2. Interest will not be charged on the expenditure on a survey for a projected work before construction commences, but for the year in which construction is begun, interest will be charged at the rate of 4 per cent. per annum on the total survey expenditure to the end of the previous year, and on half the expenditure (whether survey or construction) during that year, and thereafter in the manner laid down in the preceding paragraph.

3. Interest charges to end of previous year will be brought over from the Administrative accounts for that year, and the net revenue realized to end of previous year and during the year will be obtained from the balance shown in Revenue account No. 3.

4. There should be a separate interest account for each project or canal classed as a Productive or Protective Public Work. No interest is charged in the case of Minor Works and Navigation, hence this statement will not be required for such works.

1. The Account of indirect charges, appertaining to the Capital and Revenue accounts, is a record of the following items:—the method of calculating the entries being noted against each—

Capitalized abatement of land revenue.—

Fixed at the amount which invested in $3\frac{1}{2}$ per cent. Government Securities of 1842-43 at the market rate of the day on which the abatement of assessment commences will produce interest equal to the abatement of land revenue.

Leave and pension allowances.—

At the rate of 14 per cent. on the gross charges for establishment.

2. There should be a separate account of indirect charges for each project or canal whether classed as a Productive Public Work, a Protective Public Work, or under Minor Works and Navigation for which Capital and Revenue accounts are kept.

Article II, Chapter III, parat. 344 to 354

1. The statement compares the total direct and indirect charges on each project or canal with the amounts of the sanctioned estimates. The authority by whom the estimates were sanctioned should invariably be quoted, and a reference should be given in all cases to the action taken in respect to excesses of estimates, etc.

2. It will be posted from the accounts Nos. 2 and 3 and precede it, and should be prepared separately for each project or canal for which Capital and Revenue accounts are kept.

3. When an estimate, sanctioned under open canal capital rules, includes several works, the total outlay against that estimate should be shown in column 5 until all the works comprised in that estimate are completed and the estimate closed.

is any indirect revenue and a total struck as in "Capital outlay,"

Examiner, P. W. Accounts.

NOTES.

Reference to P. W. D. Code.

I-1. II, Chap. II, para. 47 I.

1. The entries for this register will be obtained from the schedule of Takavi advances (Form No. 32V) and the total of the different Districts or Collectorates in each division should work up to the amounts shown in the Sub-register. It should be posted after despatch of the monthly accounts.

2. After the entries for the month have been completed the unadjusted balance at close of the month should be brought forward as the opening balance of the following month. This is essential, as it is necessary to be able to tell at a glance the unadjusted balance at close of every month. The opening balance for April will be the closing balance for the previous year.

3. A separate folio should be set apart for each Civil District or Collectorate and an Index opened for easy reference.

Examiner, P. W. Accounts,

NOTES.

Reference to P. W. D. Code.

Vol. II. Chap. III, paras. 373 and 374.

1. This form will be required only in those Provinces where the Irrigation works have been provincialized, *i.e.*, where the local Government has accepted the financial responsibility.

2. As soon after the closing of the books as possible, a statement in this form, showing the amount of interest payable by the local Government on the Capital expenditure during the year on Irrigation works not charged against Revenue, should be prepared and forwarded to the local Accountant General, a copy being submitted to the Accountant General, Public Works Department, and to the Local Government for information.

3. Interest will be calculated at the rate of 4 per cent. on the direct Capital outlay to end of previous year *plus* half the outlay of the year. In making this calculation all expenditure met from provincial revenues, from local debture loans raised by the Local Government, or from contributions, should be excluded.
